

**General :** Acetafal is a systemic insecticide for insects and mites in orchards, groves and vegetable gardens. Acetafal operates in the insects digestive system and by skin contact. Low toxicity in warm blooded animals .

**Caution:** The product is dangerously irritates the eyes and it can cause serious damage to the eyes. It is also dangerous if swallowed.

**Precaution and protection:** Safety precautions have to be established when using insecticides. Avoid swallowing and inhaling the product. The skin and the eyes have to be protected by chemical goggles and rubber gloves which are blocked to chemicals. Long sleeved working clothes have to be worn. Eating drinking and smoking while working are forbidden..The site where the spray is prepared has to be ventilated.

**Environmental precautions:** The product is toxic to bees and Bombus bees. The bee hive has to be closed in the evening and the area sprayed when there are no bees in the area. There is no harm to bees 24 hours after spraying and after 30 hours to Bombus bees.

**Directions for use:** To strengthen the efficiency of the insecticide, it is recommended to include other products from different chemical groups.

**Mixing:** measure the required amount of Acetafal and mix it with a little water, add to the partly filled spray tank and then add the remainder of water while stirring the mixture.

Crop	Pests	Dosage L/Ha or % of spray volume	Spray volume L/Ha	The last spray before harvest in days
Cotton	Bemisia Tabaci	0.4 air spraying	30-50	30
		0.25 ground spraying	70-200	
Watermelon Cucumber	Aphis gossypii	0.2	300-500	7
Tomato Pepper Eggplant Watermelon Melon Cucumber Squash	Bemisia Tabaci	0.3	300-500	7
Brassica	Phyllotreta cruciferae	0.15	300-500	10

# ACETAFAL

## Liquid Concentrate

### Insecticide

**Active ingredient:** ACETAMIPRID 200 Gr/L.

Toxicity: Health Hazard - Level 3  
UN. No: 2902

**Please read the Label before use**

**For Agriculture use only – Not for Household use**

**AGRANCE**
