

General: Amifal is an insecticide to control pest in cotton. Its active ingredient, Amitraz eliminates Heliothis, bollworm and native budworm in cotton. It must always be mixed with the registered rate of a compatible larvicide. The product may be used either in a water-based low-volume, or ultra-low volume application.

Caution: Safety precautions have to be installed when using pesticides. Do not spray near sources of water.

Environmental Caution: The product is toxic to fish and dangerous to environment

Precautions: When using the concentrate or spraying, appropriate protective clothes (long sleeved and protective garments made of PVC, mask, protective goggles, PVC or Neoprene gloves, shoes and socks) have to be worn. Eating drinking and smoking are not permitted.

Mixing: Part fill the spray tank with water and then, with the agitator running, add Amifal. Add the compatible larvicide, and complete filling the tank. Use prepared spray mixture immediately. **DO NOT allow to stand overnight.**

Ground Spray: Standard low volume boom or high volume equipment may be used. Apply in a minimum total volume of 80L/ha.

Applied Aircraft with UVL:

A minimum total spray volume of 3.0 L/ha should be applied ULV.

Application and Equipment: Accurate placement and good foliar coverage are essential. Note: Insect control could be diminished if rain falls within 6 hours of application. When mixed with Endosulfan ensure that all Endosulfan label recommendations are strictly adhered to.

AMIFAL

Liquid Concentrate Insecticide

Active Ingredient: Amitraz 200 Gr/L.

Toxicity : Health Hazard level III

U.N. No. : 3077
