Batch No.

Ex. Date:

Contains: 1 Liter

General: Clofal is a Suspension Concentrate Acaricide (ovicide) is which acts primarily as an Ovicide but has an effect on young motile stages. Duration of residual activity on target mites, especially when applied between delayed dormant and first cover, depends upon age structure of treated mite populations, species of mite, and mite predator levels. Clofal is not harmful to beneficial insects and beneficial mites. As Clofal acts primarily against the egg, apply Clofal at the first appearance of mite activity.

Caution: Skin or eye contact may cause irritation.

Environmental Caution: The product is toxic to aquatic organisms.

Precautions: When using the concentrate or spraying, appropriate protective clothes (long sleeved and protective garments made of PVC, mask, protective goggles, PVC or Neoprene gloves, shoes and socks) have to be worn. Eating drinking and smoking are not permitted. Wash hands and exposed skin before meals and after work. Do not graze livestock in treated areas. Do not apply Clofal through any type of irrigation system. **Do not apply by air.**

Mixing: Slowly invert the container several times before using, to ensure uniform mixture. Half fill the spray tank with clean water.

Add the recommended quantity of Clofal to the sprayer using a filling device (e.g. induction bowl) or by direct addition to the sprayer tank. Add washings to the sprayer at the time of filling. Top-up tank with water to required level.

Self-protection after use: After day's use take wash with water and soap, change clothes, and launder the work clothes separately.

Crops	Pests	Dosage L/Ha	Spray volume L/Ha	The last spray before harvest in days
Cucumber	Red and Yellow Mite	400	300-500	4
Egg plant	Red and Yellow Mite	400	300-500	4
Tomato	Red and Yellow Mite	400	300-500	2

After use:

Cleaning the spraying equipment: After spraying, the tank should be emptied from all the remains and the spray tank and all its parts have to be washed with water and detergent. The rinsing has to be disposed according to disposal instructions.

Rinsing Disposal: The rinsing from the spraying tank is not to be disposed of in fish ponds or sources of water.

Storage: Store in a closed original container in a locked warehouse especially for pesticides, away from children and unauthorized personnel. Away from food for people or animals.

Taking care of spilled material: Material, which has been spilled or expired or spoiled while in storage, is considered as dangerous waste. It had to be absorbed in sand and transfer the absorbed material to the nearest disposal plant.

Empty containers disposal: Wash the containers thoroughly – at least 3 times or in a washing facility with pressured water. Add rinsing to the spray tank. Break crush or puncture and bury empty containers in a local authority landfill.

First Aid: in case of SKIN contact remove contaminated clothing. Wash thoroughly with flowing water for 15-20 minutes. In case of EYE contact, hold eye open and rinse slowly with water for 15-20 minutes. Remove contact lenses after the first 5 minutes then continue to rinse the eye. In case of SWALLOWING wash out mouth with water. Do not make the person vomit. If INHALED, move person to fresh air, if person is not breathing call an ambulance then give artificial respiration. Immediately obtain medical attention and present the label of the product.

Medical information : in case of poisoning call Poisons Information Center
